

(WR) Huddersfield Line Track & Ground Texture Patch

A patch for DTG's Huddersfield Line: Manchester - Leeds

This patch changes the default track (or AP track) to Gü Studios/JT track on Huddersfield Line: Manchester - Leeds. It also changes the ground textures to match. Two versions are included, one which changes the track to Gü's Oily version, and one which changes it to Gü's clean version. Also included is a short extension to the track at Huddersfield Platforms 5 & 6, so full length units can fit in as per real life. Operational length of platforms 0 and 17 in Leeds have been shortened as per real life.

You require the following DLC:

- **Just Trains Midland Main Line (any version)**
- **Just Trains Hope Valley Extension (if you don't have this, you will only be missing a couple of buffer stops)**

Please Note

- **There may be some areas where the ballast of the track 'clips' into the ground. Unfortunately, this is a 'perk' of swapping track.**
- **Pointwork is a bit 'ugly' due to the swapped track. Going through each set and re-doing them would be unrealistically time consuming.**
- **Due to the Gü track not having buffers at the ends of sections, these may be missing in some locations. I have been through and re-added them. If I have missed any, please let me know and I will add them.**
- **Whilst the platform extensions/reductions are only minor, this *might* affect some scenarios. If so, you may need to manually edit these in the editor if any AI uses platform 0 or 17 in Leeds.**

To install: Back up your Railworks/Assets/DTG/LeedsManchester/RailNetwork/Track (& Environment) folders. Then, go into the folder of your choice of either Clean or Oily track and simply copy and paste the included Content and Asset folder from the download into your Railworks folder, then click 'Replace the files in this destination' for all.

If you enjoyed this, or have any feedback or issues, please let me know via my Facebook page: <https://www.facebook.com/WestieRail-75B-Scenarios-104621564617517/> or by email at: WestieRailScenarios@outlook.com

Unfortunately, I can't be held responsible for any damage caused to your TS install, any or your computer, although this is highly unlikely

Finally, enjoy!
