(Anything with a * next to it indicates that it's not essential to the running of the scenario, you can press F2 and 'OK' when the scenario starts, but you *will* see less AI about)

Please Note

- You will notice fewer trains stabled at Lovers Walk and Selhurst Depots. This is to save FPS.
- Class 387s substitute for Class 700s, due to a realistic version not being available for TS yet.
- I have chosen to use South London & Thameslink rather than South London to Brighton due to the former having more recent updates.
