Please note

- There are no static consists placed in yards or depots. This is to save those precious FPS!

- Two versions of this scenario are included. One for the re-released unbranded version of Welsh Marches and South Wales Coastal, and one for the branded versions. Simply choose which one you wish to install from the download. Anybody who bought Welsh Marches and South Wales Coastal before they were first taken off sale will have both unbranded and branded versions of both routes. Ensure that you have installed the associated correct version from the Steam workshop.

- This scenario is set in 2021. The route is set in 2016. So in this scenario there is no OHLE between Newport & Cardiff Central as there is in real life (As of the end of 2019)
