

2D64 1717 London Euston - Watford Junction

A scenario for DTG's WCML South

Drive London Overground's 378214 on 2D64, 17:17 London Euston - Watford Junction, on a hot Friday afternoon in June 2018. It has been around 6 Months since West Midlands Trains/London Northwestern Railway took over the West Midlands franchise, and it is around 18 months before Avanti take over the West Coast Partnership franchise. You'll be calling at all stations, and major delays have been reported on the Bakerloo Line, so you'll have to keep your wits about you!

You require the following DLC:

- **WCML South: London Euston - Birmingham (Steam)**
- **London Overground Class 378 'Capitalstar' (Steam) (and/or North London Line) (Steam)**
- ***North Wales Coastal (Steam - Discontinued. But you can buy a Train Simulator 2018 Key online which will give you this route, it WON'T overwrite Train Simulator 2020)***
- ***Portsmouth Direct Line: London Waterloo - Portsmouth (Steam)***

- ***AP Class 390 Sound Pack***
- ***AP Class 350 Enhancement Pack***
- ***AP Sky & Weather Pack (If you don't have this, a default, unspecified standard weather pattern will be applied)***
- **AP Track Enhancement Pack (Recommended)**

<https://www.armstrongpowerhouse.com/>

- **MajorWalesDesign's Class 390 Avanti West Coast**
<https://www.major.wales/reskins/AWC>
- **MajorWalesDesign's Class 390 Virgin Trains Class 390**
<https://www.major.wales/reskins/VT>

- **Virtual District Team's Virtual District Line**
<https://backdatedtrainsim.weebly.com/virtual-district-line.html>

(Anything with a * next to it indicates that it's not essential to the running of the scenario, you can press F2 and 'OK' when the scenario starts, but you *will* see much less AI about. For the full experience, please make sure you own all of the requirements.)

Please Note

- **As well as the scenarios, a fix for the 377/2's pantograph (so that the AI runs with it raised) has been provided. Huge thanks to **Ash Clark** for providing this!**
- **Your timings, as well as the timings of AI trains, are based on the October 2020 timetable, but with a couple of changes to better match them to August 2019.**
- **The appearance of the "5 Car Train" headboard on the front of 378 units seems to be random. If you don't want this on the front of the train, then reloading the scenario **may** remove it.**
- **Please try to stick as closely as possible to speed limits so that you get the desired effects from this scenario.**
- **You will notice fewer, if any trains stabled in yards and depots, for example Willesden. This is to save FPS.**
- **1973 Tube Stock substitutes for 1972 Tube Stock. The cab in the middle of the consists is as per the 1972 Tube Stock. The destinations or numbering won't be correct.**
- **I have tried my best to match other Unit numbers with their correct and current livery as per real life, using Resources available. If you notice one that's in the incorrect livery, or with incorrect numbering, please contact me, and I will sort it out ASAP.**

To install, simply copy the included Content and Assets folders into your Railworks folder.

Finally, enjoy!

If you do have any issues, or any feedback, please don't hesitate to let me know at: WestieRailScenarios@outlook.co.uk, or via my Facebook page:
