(Anything with a * next to it indicates that it's not essential to the running of the scenario, you can press F2 and 'OK' when the scenario starts, but you *will* see much less AI about. For the full experience, please make sure you own all of the requirements and check the individual requirements of each above.)

Please Note

- **Your timings, as well as the timings of AI trains, are based on the October 2022 Timetable.**
- **Please try to stick as closely as possible to speed limits so that you get the desired effects from this scenario.**
- **Class 333s (and their respective services) are absent at Leeds due to this unit not being available for TS.**
- **I have tried my best to match other Unit numbers with their correct and current livery as per real life, using Resources available. Some Northern liveries may be slightly outdated, due to newer (post public takeover) NT reskins not being available yet (please let me know if you know of any). If you notice one that's in the incorrect livery, or with incorrect numbering, please contact me (including where to find the reskin if possible please), and I will sort it out ASAP.**
