(Anything with a * next to it indicates that it's not essential to the running of the scenario, you can press F2 and 'OK' when the scenario starts, but you *will* see much less AI about. For the full experience, please make sure you own all of the requirements.)

Please Note

- **Your timings, as well as the timings of AI trains, are based on the *full* May 2019 timetable.**
- **Please try to stick as closely as possible to speed limits so that you get the desired effects from this scenario.**
- **You will notice fewer, if any trains stabled in yards and depots, in order to save FPS**
- **I have tried my best to match other Unit numbers with their correct and current livery as per real life, using available resources. If you notice one that's in the incorrect livery, or with incorrect numbering, please contact me, and I will sort it out ASAP.**

To install, simply copy the included Content and Assets folders from your chosen traction folder into your Railworks folder.
