

## **2N29 07:05 Crewe - Newark Castle**

**A scenario for **Just Trains'** Midland Main Line & Derby Nottingham Leicester & Nottingham-Lincoln.**

**Drive East Midlands Railway 170273 (not long arrived from Transport for Wales) on 2N29, 07:05 Crewe - Newark Castle, for the remainder of the journey from Derby to Newark Castle on a fairly cloudy Monday morning in April 2023. Things appear to be running smoothly for once, perhaps aside from a few late running services. Enjoy it while it lasts!**

**You require the following DLC:**

(Anything with a \* next to it indicates that it's not essential to the running of the scenario, you can press F2 and 'OK' when the scenario starts, but you \*will\* see much less AI about. For the full experience, please make sure you own all of the requirements.)

**\*Please Note\***

- **Your timings, as well as the timings of AI trains, are based on the April 2023 timetable.**
- **Please try to stick as closely as possible to speed limits so that you get the desired effects from this scenario.**
- **You will notice fewer, if any trains stabled in yards and depots, for example Etches Park. This is to save FPS.**
- **I have tried my best to match other Unit numbers with their correct and current livery as per real life, using Resources available. If you notice one that's in the incorrect livery, or with incorrect numbering, please contact me, and I will sort it out ASAP.**

**To install, simply copy the included Content and Assets folders into your Railworks folder.**
