

2S97 05:33 Salisbury - Salisbury

A scenario for [Just Trains Wessex Main Line: Southampton – Salisbury Extension](#)

Drive South Western Railway 158890 on 2S97, 05:33 Salisbury – Salisbury, on the first stopping service of the day; on a circuitous trip via Southampton Central, on a foggy morning in May 2024. Services are just getting started for the day, so a clear(ish!) run is expected, but you will need to navigate around a few ECS moves as you drive this Romsey Rocket service.

You require the following DLC (and their requirements, which may not be listed below)

- **Just Trains Wessex Main Line: Southampton – Salisbury Extension**
- **Just Trains Voyager Advanced 2019**

<https://www.justtrains.net/>

- **Armstrong Powerhouse Class 158/159 (Cummins) Enhancement Pack**
- ***Armstrong Powerhouse Class 375/377 Enhancement Pack***
- ***Armstrong Powerhouse Class 444/450 Enhancement Pack***
- ***Armstrong Powerhouse FSA/FTA Wagon Pack***
- ***Armstrong Powerhouse Class 66 Enhancement Pack***

<https://www.armstrongpowerhouse.com/>

- ***AzeezSim SWR 444/450 Reskin Pack 2.1***

<https://semaphoresim.com/file/54-swr-444-450-reskin-pack/>

(Anything with a * next to it indicates that it's not essential to the running of the scenario, you can press F2 and 'OK' when the scenario starts, but you *will* see much less AI about. For the full experience, please make sure you own all of the requirements)

Please Note

- Your timings, as well as the timings of AI trains, are based on the May 2024 timetable.
- Please try to stick as closely as possible to speed limits so that you get the desired effects from this scenario.
- You will notice less (if any) stock stabled in depots and sidings. This is to help with FPS.

To install, simply copy the included Content and Assets folders into your Railworks folder.

If you do have any issues, or any feedback, please don't hesitate to let me know at: WestieRailScenarios@outlook.co.uk, or via my Facebook page:
