

2T49 15:54 London Euston - Tring

A scenario for DTG's WCML South: London Euston – Birmingham New Street

Drive London Northwestern Railway 319457 (& 214) on 2T49, 15:54 London Euston – Tring, on an overcast afternoon in April 2023. It's just a few months before these 319s are withdrawn (to be replaced by 730s), so make sure to enjoy the GTO traction thrash as you weave your way out of a pre-Rush Hour London.

You require the following DLC (and their dependencies, which may not be listed below)

- **WCML South: London Euston – Birmingham New Street (Steam)**
- ***Armstrong Powerhouse Class 66 Enhancement Pack***
- **Armstrong Powerhouse Class 319 Enhancement Pack Vol.1**
- ***Armstrong Powerhouse Class 350 Enhancement Pack***
- **Armstrong Powerhouse Class 375/377 Enhancement Pack**
- ***Armstrong Powerhouse Class 390 Enhancement Pack***
- ***Armstrong Powerhouse Signal Enhancement Pack***

- ***Virtual District Team Virtual District Line***

- ***Just Trains Cargowagon IWB Pluspack (Included with Class 60 Advanced)***

(Anything with a * next to it indicates that it's not essential to the running of the scenario, you can press F2 and 'OK' when the scenario starts, but you *will* see much less AI about. For the full experience, please make sure you own all of the requirements)

Please Note

- **Your timings, as well as the timings of AI trains, are based on the April 2023 timetable.**
- **1973 stock stands in for 1972 stock, due to the latter not being available for TS.**
- **Please try to stick as closely as possible to speed limits so that you get the desired effects from this scenario.**
- **You will notice less (if any) stock stabled in depots and sidings. This is to help with FPS.**

To install, simply copy the included Content and Assets folders into your Railworks folder.
