**Drive London Northwestern Railway's 350373 & 350253 from London Euston to Birmingham New Street on a snowy Sunday morning in January 2021. The Northampton loop is closed today, and the Up & Down slow lines in various locations (due to planned engineering work), so you will be diverted via Weedon.**

**\*Please Note\***

- **When the scenario first loads, the game may freeze for a few seconds (I'm not sure of the reason why), so please be patient as it will load.**
- **A fix for the 377/2's pantograph (so that the AI runs with it raised) has been provided. Huge thanks to **Ash Clark** for providing this!**
- **Your timings, as well as the timings of AI trains, are as per the January 2021 Sunday timetable.**
- **You will notice fewer, if any trains stabled in yards and depots, for example Willesden. This is to save FPS.**

- **I have tried my best to match Unit numbers with their correct and current livery as per real life, using Resources available. If you notice one that's in the incorrect livery, please contact me, and I will sort it out ASAP.**
