9K53 17:32 Luton - Orpington

A two-part scenario for DTG's Midland Main Line London-Bedford and Chatham Main Line: London Victoria & Blackfriars - Dover & Ramsgate.

Drive Thameslink's 700014 on most of 9K53, 17:32 Luton - Orpington, on a dreary Thursday evening in May 2022. It's looking to be a relatively clear run (delay wise, not the weather). Hopefully it stays that way, but anything goes!

You will require the following DLC:

- **Midland Main Line London-Bedford** (Steam)

- **Chatham Main Line: London Victoria & Blackfriars - Dover & Ramsgate** (Steam)

- **Thameslink BR Class 700 EMU** (Steam)

- ***Chatham Main & Medway Valley Lines** (Steam)*

- ***Great Eastern Main Line: London-Ipswich** (Steam)*

- **AP Class 375/377 Enhancement Pack**

- **AP Class 465/466 Enhancement Pack V2**

- **AP Class 700/707/717 Enhancement Pack**

- ***AP Class 66 Enhancement Pack***

- ***AP Class 68 Enhancement Pack***

- ***AP Sky & Weather Pack (If you don't have this, a default, unspecified standard weather pattern will be applied)***

- ***AP Track Enhancement Pack (Recommended)***

https://www.armstrongpowerhouse.com/

- ***AzeezSim EMR 170-222 Reskin Pack***

https://semaphoresim.com/file/56-emr-170-222-reskin-pack/

- ***Just Trains Class 222 Advanced 2019***

- ***Just Trains Class 20 Advanced Collection***

https://www.justtrains.net/

- ***Alistair Cowell's EMR Connect Class 360***

https://alanthomsonsim.com/downloads/emr-connect-class-360/

(Anything with a * next to it indicates that it's not essential to the running of the scenario, you can press F2 and 'OK' when the scenario starts, but you *will* see much less AI about. For the full experience, please make sure you own all of the requirements.)

(Please see next page)

Please Note

- Your timings, as well as the timings of AI trains, are based on the *full* May 2022 timetable.

- Please try to stick as closely as possible to speed limits so that you get the desired effects from this scenario.

- You will notice fewer, if any trains stabled in yards and depots, in order to save FPS

- I have tried my best to match other Unit numbers with their correct and current livery as per real life, using available resources. If you notice one that's in the incorrect livery, or with incorrect numbering, please contact me, and I will sort it out ASAP.

- Midland Main Line London-Bedford is now quite a dated route, so isn't up to date with RLU/FLU/ALL signs and extended platforms etc.

- Whilst the numbering of 222 units is correct, the destinations on both ends still show as 'Barnsley'. If anyone knows how to fix this, please get in contact!

- Unfortunately we have no complete rendition of the Thameslink core, so the first part of this scenario ends at St Pancras and the second part begins at City Thameslink.

To install, simply copy the included Content and Assets folders into your Railworks folder.

Big thanks to Simon Brugel (Cynx - https://www.cynxs-stuff.com/) for his help with scripting.

If you enjoyed this scenario, have any feedback or to report any bugs, please let me know via my Facebook page: https://www.facebook.com/WestieRail-75B-Scenarios-104621564617517/

Unfortunately, I can't be held responsible for any damage caused to your TS install, or your computer, although this is highly unlikely

Finally, enjoy!
